Lava™ Zirconia – there is a difference

Strength and longevity – proven with clinical results.

Lava™ Zirconia has a 100% survival rate in 5+ years of clinical studies.¹

Crowns

- Comparison PFM and Lava™ all ceramic crown
N. Lasser, E. Pieslinger, University of Vienna, Vienna
Start 2004
- Lava all ceramic anterior crowns with reduced wall thickness (0,3 mm)
D. Edelhoff, H. Spiekermann, University of Aachen;
A. Raigrodski, University of Washington, Seattle
Start 2004
Start 2005

Start 2003
- Multi center study at general practitioners
T. Burke, University of Birmingham, Birmingham
Start 2004

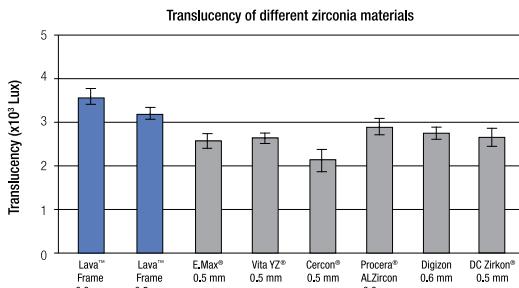

Marginal fit.

Lava zirconia has excellent fit relative to leading competition.^{2,3,4}

Translucency and restoration esthetics.

Lava zirconia shows a significantly higher translucency relative to the competition shown.⁵

1. 3-unit posterior bridges, P. Pospiech, University of Homburg, Homburg (Start 2000).

2. 0828 In-Vitro Vertical Marginal Gap Comparison of CAD/CAM Zirconium Copings, A.J.T. Shannon, F. Qian, P. Tan, and D. Gratton, University of Iowa, Iowa City, USA (2007).

3. 3M ESPE Lava showed the lowest marginal and absolute marginal gap in comparison to Cercon and DCS, A. Piwowarczyk, H.-C. Laufer, Determining the marginal fit of CAD/CAM bridge frameworks, Pan European Federation Conference (PEF; CED) #0254 (2006).

4. Lava 3-unit bridges showed smallest Marginal gap v. Etkon, Cercon brain, Cerec Inlab, F. Beuer, T. Fischer, K.-J. Erdelt, H.-U. Aggstaller, K. Spiegl, W. Gernet; (2005) IADR #136 and *In-vitro Study Marginal fit of Lava restorations*; F. Beuer, T. Fischer, K.-J. Erdelt, H.-U. Aggstaller, K. Spiegl, W. Gernet, industrial report (2006).

5. Translucency of different zirconia materials, Prof. R. Scotti, Prof. P. Baldissara, Dr. A. Llukacej, Dr. L. F. Valandro and Prof. M.A. Bottino, Academy of Dental Materials Conference, 2006. [Abstract 103].

Digital Restorative Materials

Lava™ Restorations

Precision fit, proven strength and natural esthetics. Lava™ Restorations from 3M ESPE has been established as a leading brand in CAD/CAM-produced zirconia restorations through its precise fit, proven strength and natural esthetics. 3M has over 100 years of manufacturing excellence and more than 25 years of zirconia research and processing. 3M ESPE brings vast expertise in materials science and systems integration to create products that consistently meet the high standard that doctors and labs expect. Lava™ Restorations from 3M ESPE. There is a difference.

Indications

- Crowns (anterior and posterior).
- Splinted crowns (up to 4 abutments).
- All possibilities of 3- and 4-unit bridges.
- 5-unit and 6-unit bridges (max. 2 pontics in posterior region, max. 4 pontics in anterior region).
- Inlay bridges.
- Maryland bridges.
- Cantilever bridges (with the pontic maximally on the second premolar; OOX, OXOX, OOOX).
- Implant abutments.
- Primary copings.

Product Benefits

- Excellent fit relative to leading competition.
- Fit cited as the most important attribute to doctors.
- Proven high strength performance – 1440 MPa 3-pt. bend strength.
- 5-year clinical study with 100% survival rate.
- Natural translucency and unmatched esthetics.
- Patented substructure system available in 8 shades.

Offering Genuine Lava™ Zirconia is Easy

3M ESPE is implementing an authentication system to clearly identify whether Doctors get authentic Lava™ Zirconia.

- 1.** Doctors ask lab for Lava™ zirconia by filling out the Lava™ Post-it® Note prescription pad, marking the “Accept No Substitute” box on the form and sending to their lab.

- 2.** Dental lab sends model to an Authorized Lava™ Milling Center (listing found at www.3MESPE.com/lava). Dental lab includes the “Lava™ Sticker” with final restoration.

- 3.** Doctors look for the “Lava™ Sticker” with their case.

Digital Restorative Materials

Paradigm™ MZ100 Block for CEREC® System

A new paradigm has developed in dentistry. More and more dentists are using chairside CAD/CAM technology. 3M ESPE has a full line of materials to support this move to digital dentistry. And our philosophy is to make our milling materials, cements and finishing products versatile and easy to use so it's quick and easy to prepare for all of your procedures.

Product Benefits

- Created from Z100™ Restorative Material from 3M ESPE.
- High flexural strength and fracture toughness.
- Enamel-like wear characteristics are superior to that of ceramic blocks.
- Easy to finish and polish.
- Can be easily characterized with light-cured composite stains and glazes.
- An ideal material for CAD/CAM where strength and occlusal wear properties are needed.
- Easy to repair intraorally.
- Indicated for inlays, onlays, crowns and veneers.

Digital Restorative Materials

Paradigm™ C Blocks for CEREC® System

Paradigm C blocks are the newest addition to the Paradigm line of blocks. These radiopaque restorations are virtually undetectable due to the good shade match and natural esthetics of the material with surrounding tooth structure.

Product Benefits

- Created from leucite-reinforced glass ceramic material.
- Well-balanced translucency and fluorescence.
- Provides a chameleon effect for good shade matching.
- Easy to polish.
- Can be stained and glazed to provide characterization.
- Indicated for inlays, onlays, crowns and veneers.

Lava™ Laboratory Products

Lava™ Precision Solutions

It's simple for labs to offer genuine Lava™ Restorations.

1. Outsourcing – simply send the design and milling of the framework to an Authorized Lava™ Milling Center.
2. Become an Authorized Lava™ Design Center (ALDC) – as you grow your Lava™ Restoration business you can bring the design in house by purchasing the Lava™ Scan ST Scanner.
3. Become an Authorized Lava™ Milling Center (ALMC) – control every aspect of offering genuine Lava™ Restorations.

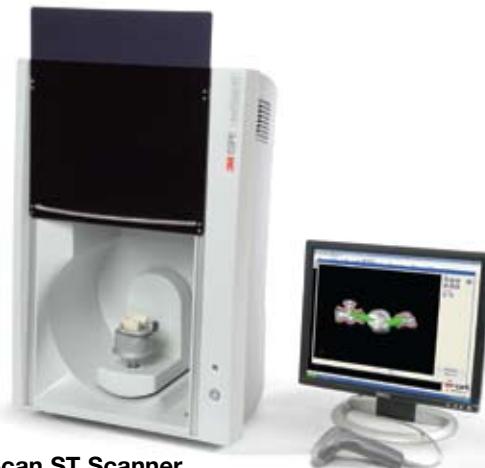

Lava™ Therm Furnace

Crown and bridge frameworks undergo sintering and attain their exact dimensions, density and final strength in the high-temperature Lava™ Therm furnace.

Product Information

Item Number

Lava™ Therm Furnace	68730
---------------------------	-------

Lava™ Scan ST Scanner

Consists of a non-contact optical scan system, a PC with a monitor and the Lava™ CAD Windows®-based software, which displays the model as a three-dimensional object.

Lava™ Laboratory Products

Lava™ Zirconia Block

A high-tech, pre-sintered zirconia ceramic material characterized by its outstanding stability and biocompatibility. Offers high strength levels, esthetic appearance (8 shades) and precision fit.

Product Information

Size

Lava™ Zirconia Block	Crown
Lava™ Zirconia Block	40mm
Lava™ Zirconia Block	60mm

Lava™ Frame Shading Liquid

Product Benefits

- Shaded frameworks are thin and translucent to ensure a natural and vital appearance.
- Patented substructure system available in 8 shades: Unshaded, FS1, FS2, FS3, FS4, FS5, FS6 and FS7.

Lava™ Milling Burs Tools for forming SD shapes for the Lava™ Form

Product Information

Lava™ Milling Burs:	
Primary cutting bur, Type 4	68612
Secondary cutting bur, Type 5	68613
Final cutting bur, Type 6	68614
Bar code removal bur, Type 7	68615
Calibration body bur, Type 10	68616

Lava™ Laboratory Products

Lava™ Ceram Overlay Porcelain Sets

Create the natural-looking, long-lasting restorations that patients demand. Developed as a part of the Lava™ System, Lava™ Ceram Zirconia Overlay Porcelain makes it easy to recreate the esthetics of a real tooth with a range of extraordinary shades and amazing optical effects that ensure a beautiful restoration. Lava™ Ceram porcelains are available in a variety of kit configurations designed to fit the way you work – and all come with a combination table that shows how to create VITA® Classic Colors.

Lava™ Laboratory Products

Rocatec™ Junior Bonding System

An abrasive blasting system that provides micromechanical and chemical adhesion and outstanding bond strengths for indirect procedures. This reliable, mobile system is compact, economical and able to be used wherever compressed air is available.

Indications

- Coating indirect restorations to achieve a micromechanical and chemical bond. Ideal for ceramics, composites and zirconia.

Product Benefits

- Provides outstanding bond strengths without marginal gap.
- Compact and economical unit is mobile and can be used wherever compressed air is available.
- Does not require a power supply.
- Easy-to-view pressure gauge allows you to monitor and regulate the unit's performance.
- Pressure-reduction valve with integral water collector supplies compressed air free of water or oil to ensure reliable operation.
- Intended for use with the Rocatec Bonding System, including Rocatec-Pre Bonding Material, Rocatec-Plus Bonding Material and Rocatec-Soft Bonding Material.

Other Laboratory Products

Sinfony™ Indirect Lab Composite

A micro-hybrid, indirect laboratory composite that combines strength, beauty and versatility. Developed for laboratories and designed to build like porcelain, the composite is excellent for inlays/onlays, veneers and full crowns.

Indications

- Full indirect composite of crowns and bridges.
- Full crowns.
- Inlays/onlays.
- Glass-fiber reinforced crowns and bridges.
- Direct-bonded bridges.
- Telescopic and conical crowns.
- Attachments and implant work.
- Veneers.
- Long-term temporary work and its characterization.
- Customization of dentures and their teeth made of acrylic and ceramics.
- Extraoral repairs.

Product Benefits

- Excellent esthetics/translucency.
- Long-term proven wear resistance.
- Ease of finishing and polishing.
- Plaque and stain resistance.
- Proven in tests to be as strong or stronger than other popular brands and to possess inherent advantages in flexibility, impact strength and color stability.
- Handles like porcelain.
- Indirect restorations created from Sinfony indirect lab composite offer natural vitality, amber opalescent effect and fluorescence.

Sinfony™ Magic Shades

Allows the dental technician to imitate cracks and chips in enamel, lime spots, filling imitations, worn surfaces and a wide variety of features in the neck, fissure or incisal area. Opens up design capabilities that were previously only possible with porcelain veneers and allows all color nuances to be reproduced.

Indications

- Imitating cracks and chips in enamel, lime spots, filling imitations and worn surfaces.
- Creating a wide variety of features in the neck, fissure or incisal area.
- Reproducing color nuances.

Product Benefits

- Excellent esthetics/translucency.
- Superior wear characteristics.
- Ease of finishing and polishing.
- Plaque and stain resistance.

I2 Atlantis	49420
I3 Chestnut.....	49430
I4 Havanna	49440
I5 Orange	49450
I6 Khaki.....	49460
I7 Vanilla.....	49470
I8 Honey Yellow	49480
I9 Gingiva	49490
I10 Red.....	49491
I11 Terra Cotta	49492
Sinfony Dispenser Handpiece	49910

All shades in 5g dispensers.

Other Laboratory Products

Visio™ Alfa Light Unit

A curing light unit designed for pre- and intermediate polymerization of light-cured composites, such as Sinfony™ indirect lab composite.

Indications

- Pre- and intermediate polymerization of light-cured composite materials.
- Suitable for all light-cured composites, such as Sinfony indirect lab composite and Visio-Form Light-Cured Modeling Resin.

Product Benefits

- Allows for direct and functional layering of light-cured composite material.
- Built-in proximity sensor automatically controls the light source once the object is positioned at the correct distance from the lamp.

Product Information	Item Number
Visio Alfa Light Unit	77121
Visio Alfa Replacement Light	77160

Visio™ Beta Vario Light Unit

A curing light unit for final vacuum polymerization of light-cured composite materials, the unit has a mirrored polymerization chamber that guarantees complete illumination for deep and thorough polymerization.

Indications

- Final vacuum polymerization of light-cured composite materials.
- Final vacuum polymerization of light-cured tray materials.

Product Benefits

- Ideal for polymerization of veneers made from Sinfony indirect lab composite to guarantee veneer strength and color stability.
- Mirrored polymerization chamber provides complete illumination for deep and thorough polymerization.
- Vacuum technique removes oxygen-inhibited layers for improved surface hardness.
- Includes three additional programs for versatile use, e.g., for curing MultiTray Light-Cured Maxillary and Mandibular Baseplates.

Visio Beta Vario Replacement Light	77170
Visio Beta Pump Oil	77150

Other Laboratory Products

Visio™-Form Light-Cured Modeling Resin

A light-cured modeling resin that offers highly precise impressions and is designed to meet the requirements of today's casting techniques.

Indications

- Casting inlay and onlay patterns.
- Modeling conical crowns, telescopic crowns and variations of these crowns.
- Modeling cast extensions without a duplicate model.
- Adhesive bridges and soldering models for blocking.

Product Benefits

- High impression precision.
- Ensures homogeneous cast objects.
- Offers high mechanical strength and low polymerization shrinkage.
- Easy to lift away from the primary structures due to internal isolations.
- Burns out cleanly.
