

Equipment and accessories catalogue

WELCOME

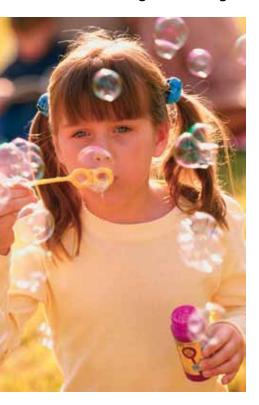

Zhermack specializes in the production of materials and equipment for dental practices and dental laboratories, and provides its customers products whose trademarks are constant innovation and excellent quality.

Zhermack, undisputed leader in impression material production, was founded in 1981 and quickly positioned itself among the most important companies in the dental sector.

Besides its headquarters in Italy, Zhermack has branches in Germany, the United States and Poland and has Representative Offices in key locations such as Russia, United Kingdom, Spain, France, Mexico, Colombia and Turkey.

The widespread distribution network, with over 800 distributors worldwide, guarantees global sales coverage.

BEYOND INNOVATION

Zhermack is one of the few companies in the dental sector around the world to synthesize polymers and catalysts completely in-house, thus ensuring control over all the phases in the manufacturing process and achieving high quality standards.

The Clinical and Technical divisions work in partnership with international researchers and leading universities so as to be able to continually propose innovative solutions for the more demanding dentists and dental technicians.

ZHERMACK CLINICAL

The Clinical division provides solutions for the dentistry sector.

The market demands innovative and reliable products; Zhermack Clinical responds to the needs of dentists by creating advanced products such as the first sterile silicone for surgical use or thermochromic silicone for impressions.

The ongoing investments into research and development are aimed at putting into practice effective solutions to improve the everyday work of the dentist.

ZHERMACK TECHNICAL

The Zhermack Technical division manufactures products and equipment for the dental laboratory market.

A quality prosthetic device is the result of using reliable materials that can guarantee the perfect outcome of any application; Zhermack Technical, with its nearly thirty years of experience and know-how, understands the work of dental technicians, and provides them a series of materials and equipment that can fulfill any requirement impeccably.

The solutions for dental laboratories include a vast range of silicones for making a matrix, model duplication and gingival reproduction on models, as well as a complete series of dental stone that, together with the numerous tools and equipment, form an integrated systems for all types of work.

TOTAL QUALITY

At Zhermack, respect for the environment is an key value. The company's environmental culture is expressed through a carefully adopted system for managing processes, standards and procedures aimed at minimizing the environmental impact of the manufacturing technologies.

The UNI EN ISO 9001 and ISO 14001 certification confirm the importance that Zhermack attributes to total quality management, while compliance with the strictest registration standards set by the competent health authorities, such as the US Food and Drug Administration, protects the end user of Zhermack products.

Zhermack works with constant respect for man and the environment, though ongoing health checks, environmental monitoring, reduction of fume and noise emissions, and the updating of all safety standards.

Hurrimix

Automatic mixer for alginates and stones*

APPLICATIONS

Automatic mixer for alginates and stones*

CHARACTERISTICS

- Large digital display
- Software with 20 mixing programs:
- 10 alginate programs, including 7 customised for Zhermack alginates, but can be modified according to need
- 10 dental stone programs, including 7 customised for Zhermack elite® dental stones, but can be modified according to need
- Can mix small quantities of Zhermack elite® dental stones* (up to 100g)
- Design with personalisable front cover in 6 colours (standard white or optional orange, green, blue, navy and grev)
- Electronic microprocessor control
- Polycarbonate membrane controls
- Metal/plastic casing
- Standard equipment: spatula kit, pre-mixing stick, spatula holder, 2 alginate mixing containers, 2 stone mixing containers, 1 water bottle with graduated measuring cup
- Silent running: noise level <70 dB

ADVANTAGES

- Constant mixing quality
- Homogenous, creamy mix
- Far shorter mixing times than with manual mixing
- Extremely simple to use and clean: the container hermetically seals to avoid all dispersion of material during mixing
- Large digital display allows easy program setting
- Latest generation, compact design with rounded corners. Covers available in 6 different colours to match your clinic decor

*Guaranteed mixing quality for Zhermack elite® rock, elite® master, elite® stone, elite® model, elite® model Fast, elite® ortho and elite® arti stones.

Zhermack[®]

Alghamix II

Mechanical mixer for alginates, plasters and silicones

APPLICATIONS

 Alghamix II allows for the mechanical mixing of alginates, plasters and silicones for dental use

CHARACTERISTICS

- 2 speed rotation
- Ergonomic speed selector
- Bayonet bowl-fastener
- Available bowls: small 350 cc for alginate, large 600 cc for plaster
- Available bowl colours: grey, orange, green, light blue, navy blue, white
- Plate with 20-sheet mixing block for silicones
- ABS body

ADVANTAGES

- 30% reduced mixing time when compared to manual mixing
- · Reduced air incorporation during mixing
- Homogeneous bubble free mixing
- Constant bowl rotation guaranteed by the two speeds
- Structure and design specifically designed to guarantee maximum stability during use
- Ergonomic bowl position which allows for optimal operating conditions
- Easy to remove and easy to clean bowl
- Coloured bowls easily adaptable to clinic colours
- 600 cc bowl for plaster and silicone mixing plate usable for various purposes.
- 3 year warranty

For further information about which products can be used, please refer to the data sheets on our website: www.zhermack.com about: alginate, dental stones and C-Silicones

Modulmix

Automatic A-Silicone mixer with a 5:1 mixing ratio

APPLICATIONS

 Automatically mixes A-Silicones for impressions prepared in 5:1 mixing ratio cartridges (362-380-390 ml)

CHARACTERISTICS

- Possibility of connecting numerous machines in-line
- Two dispensing speeds:
- Normal: 70* ml/min
- Fast: 155* ml/min
- Motorised plunger (forward & reverse) for changing cartridges (max 3 sec)
- Customizable side cills to match surgery decor (optional extra)
- Ergonomic design
- Two dispenser buttons
- Cartridge level indicator
- Retracting, finger-safe pistons to guarantee maximum safety standards
- Available in countertop or wall-mounted versions
- Available in 230V, 230V uk plug and 115V versions
- Compatible with all 5:1 systems currently available on the market

ADVANTAGES

- With respect to manual mixers, the Zhermack system automatic mixing is easy, constant and offers higher quality
- With Modulmix, the mixing phase is notably reduced to give more product working time
- Modularity: the possibility to connect numerous machines in-line allows for the use of numerous materials simultaneously (heavy body - alginate replacement)
- Two dispensing speeds, fast for filling the tray, normal for filling a syringe
- Compact and linear design which guarantees reduced encumbrance upon working surfaces
- Transparent plastic cover allows for immediate viewing of both the material being used as well as the level of material remaining in the cartridge
- Two dispensing buttons located on either side of the Modulmix, for left & right handed operators
- 2 year warranty

*Zhermack internal test

Zetaclave

Class B and S autoclaves

APPLICATIONS

Zetaclave B

 Sterilisation in surgery of solid instruments, hollow instruments (type A and B), packeted instruments and porous loads

Zetaclave S

 Sterilisation in surgery of type B hollow instruments, solid instruments, packeted instruments and small porous loads

CHARACTERISTICS

- Vacuum pump high performing two-stage
- LCD graphic display showing sterilisation cycles and phases
- 12 pre-set programs
- Stainless steel chamber
- Motorised closure with triple safety device
- Electronic vacuum drying
- · Automatic loading of water with self-priming pump
- Ready for connection to demineraliser and automatic dirty water drainage
- Built-in printer
- Ready for connection to data logger
- M.T.S. (Memory test system) which allows the diagnosis of the last 10 cycles performed
- Instant vaporiser outside the chamber
- Thermal drying system
- Validation cycles: HELIX*, BOWIE & DICK, VACUUM TEST
- Double tank: clean water and dirty water
- 2 year warranty

Zetaclave B

- Vacuum pump high performing two-stage
- Fractionated vacuum

Zetaclave S

- Vacuum pump two-stage
- Pre and post vacuum

*Only for type B

For further information about which products can be used, please refer to the Zeta Hygiene data sheets on our website: www.zhermack.com

Standard Zetaclave B - S equipment

1 reversible anodised aluminium tray holder
4 trays
1 funnel
2 water draining pipes

- 1 water loading pipe with filter
- 1 cleaning sponge
- 1 tray extraction handle

ADVANTAGES

- The stainless steel chamber, pressed in a single block, guarantees the maximum attainable levels of hygiene.
- The external treatment guarantees greater resistance and a long lifespan
- The motorised door is easy to open and guarantees high levels of safety thanks to triple protection and selfregulation
- The built-in thermal printer allows the user to verify all the sterilisation cycles.
- The use of the mineraliser allows automatic water loading and does not require the daily intervention of the operator (optional)
- The reversible tray holder contains up to 4 trays and can be rotated, allowing the insertion of two cassettes for implantology
- The possibility to make use of the STS data logger allows information management and the storage of the cycles performed (optional)

Colour door (optional)

STS data logger

Elite® mix

Mixer for plaster and investments

For further information about which products can be used, please refer to the Elite Dental Stone data sheets on our website: www.zhermack.com

APPLICATIONS

- Vacuum-sealed mixer for investments with lost-wax casting techniques
- Vacuum-sealed mixer for plaster models

CHARACTERISTICS

- Electronic control with microprocessor and LCD alphanumeric display
- MFC control system (multifunctional control handpiece)
- 10 different programs which can be set with the following parameters:
 - spatulation time
 - spatulation speed between 100 and 450 rev/min
 - pre-spatulation enabling
 - pre-insertion vacuum
 - interval time allowing spatula direction rotation change
- · Electronic vacuum control and double filter
- Wall or bench-mounted with appropriate stand (optional)
- 200 and 1000 cc bowls (optional extras)
- Magnetic sensor for bowl removal
- "Safety" system for bowl removal in case of power failure

ADVANTAGES

- Fast, simple, intuitive programming thanks to the LCD display and the multifunction control handpiece
- 10 personalisable programs, 6 of which are pre-set for Zhermack dental stones
- Maintenance is not necessary for the oil free vacuum pump
- Even and bubble-free mixture guaranteed by the multifunction software and electronic vacuum control
- A magnetic sensor detects the presence of the bowl and automatically activates the mixing programme.
 Everything can be handled with just one hand!
- Elite Mix bowls' angles are rounded for recovering the mixture and for easy cleaning operations
- Even and bubble-free mixture guaranteed by the multifunction software and electronic vacuum control
- A magnetic sensor detects the presence of the bowl and automatically activates the mixing programme.
 Everything can be handled with just one hand!
- Elite Mix bowls' angles are rounded for recovering the mixture and for easy cleaning operations
- 2 year warranty

Zhermack[®]

Doublemix

Automatic mixer for duplication A-Silicones

APPLICATIONS

 Automatically mixes the liquid silicones (A-SILICONE) used for duplicating models in laboratories

CHARACTERISTICS

- Dosing pump with 1:1 mixing ratio
- · Adjustable plate for holding mixing tip
- · Anodised aluminium support with flask alignment
- Adjustable container support brackets
- Quick container insertion with flow shut-off valve
- Provision for direct connection to all Elite Double pack sizes (1kg, 5kg, 10kg)
- Sintered bayonet filters for air venting from tanks
- Optional clear containers, 2kg capacity

ADVANTAGES

- Use of Doublemix in combination with elite double extra fast allows for model duplications in little more than 6½ minutes
- Thanks to its state of the art dosing pump, doublemix guarantees a drip-free, bubble-free surface allowing for repeated duplications unlike manual mixing machines
- The adjustable disk allows you to align the flow, and facilitates insertion of the mixing tip
- The aluminium support helps position the flask correctly on the work surface
- The quick insertion system and flow shut-off valves prevent the formation of air bubbles during liquid delivery
- Adjustable bracket design is compatible with all of Zhermack's duplication silicone pack sizes
- The start button is specially positioned to facilitate filling the flask
- 2 year warranty

Giga

Porcelain furnaces and combination unit

APPLICATIONS

 Furnaces for the firing of ceramics on metal-ceramic, all ceramics, ceramic-zirconium, ceramic-aluminium, and ceramic-titanium restorations

CHARACTERISTICS

Giga

- Innovative design and state-of-the-art electronics
- · Large graphic display
- 200 programs available, 25 of which are pre-set for the most common traditional ceramics
- Ergonomic membrane keyboard
- · Incorporated empty sensor
- 13 parameters which the user can set for each program
- HELP function to aid the operator with programming
- Equipped with special functions to modify the program being carried out, to re-fire the ceramics if necessary and to quickly cool down the chamber
- Device for automatic temperature calibration device available (optional)

Giga press

- Same characteristics as the Giga furnace, but also equipped with a pneumatic system for carrying out pressable ceramics
- Out of 200 programs, 20 are specific for the pressable ceramics
- Need for a compressed air connection

For further information and photos, please refer to the product data sheet on line at www.zhermack.com

Satovac 1

Vacuum pump 4 m³/hour

Giga

ADVANTAGES

- Innovative structure of the chamber allows greater thermal performance which is advantageous for temperature control which results as being more precise in both the static and dynamic phases.
- A diagnostics menu allows the user to verify all the functions of the furnace in real time
- The HELP function aids in Giga press use
- Pre-set programs for all the most common ceramics
- The possibility of managing plate opening and closing modes in detail
- The injection phase periodically alternates thrust and waiting phases which optimise the result of the pressable ceramic even with minimum thicknesses.
- 2-year warranties

Vacuum pump Satovac 1

Satovac 1

APPLICATIONS

 For all applications where a good level of vacuum is required (760 mbar max)

CHARACTERISTICS

- Rotary vane pump with oil lubrication
- Flow rate: 92 litres/minute 4m³/hour
- Maximum vacuum which can be reached: 760 mbar

ADVANTAGES

- Reaches the maximum vacuum in a very short time
- 1-year warranty

Technical data

Zhermack TECHNICAL

Dune ECOTECH

Micro-sandblasting machine with recirculating sand system

For further information and photos, please refer to the product data sheet on line at www.zhermack.com

Standard components XH9930020 Short nozzle, Ø 0.6 (only in Dune 3 ECOTECH) XH9930030 Short nozzle, Ø 0.8 mm XH9930040 Short nozzle, Ø 1.3 mm XH9930050 Recycling nozzle, Ø 3 mm XI0060070 Sandblasting gloves

APPLICATIONS

Cleaning, polishing and roughening of prosthetic materials

CHARACTERISTICS

- Large chamber (25 I) with ergonomic design
- Adjustable LED lighting with interchangeable protection film
- 1000cc tanks with level indicator and air vents
- Pneumatic system to adjust sand flow using calibrated dosing nozzles in the tanks
- Immediate flow shut-off valves in the pneumatic system
- Sand recirculating system with its own handpiece and support
- Pressure regulator and sand selector positioned in the sandblasting chamber
- Plug to connect/activate the suction
- Double suction connection (right and left)
- Ergonomic handles with tungsten carbide nozzles, available in different shapes and diameters
- Inlet anti-condensation filter with manometer
- Feet are adjustable to alter the height
- 3rd tank (optional for Dune 2) in different grain size ranges
- Long, high-precision nozzles in 0.6, 0.8, 1.3 mm diameter (optional extras)
- Compressed air gun in chamber (optional)

ADVANTAGES

- Very low sand consumption when compared to standard sandblasters
- Powerful, homogeneous lighting
- The ergonomic design of the handles and nozzles makes sandblasting more efficient and accurate
- Possibility to install a third, optional tank on the Dune 2 ECOTECH model. The operator is in charge of this installation
- Suction is equally efficient from either side of the machine
- Suction can be activated when the sandblaster is switched on
- Tanks do not have to be topped up so frequently
- 2-year warranty

C305608	Vacuum SAB 1000

The full list of oxides and microspheres con be found in the product sheet of Zeta Sand.

Dune

Module sandblasting machine

For further information and photos, please refer to the product data sheet on line at www.zhermack.com

Standard components

	
XI0060720	Glass protection sheets (2 pcs.)
XH9900100	Ø 0.6 mm nozzle (1 pc.)
7113300100	20 0.0 mm 110221c (1 pc.)
XH9900120	Ø 1.3 mm nozzle (1 pc.)
XH9900110	Ø 0.8 mm nozzle (Dune 3 - 3 pcs.) - (Dune 2 - 2 pcs.)

APPLICATIONS

- Multiple module sandblasting machines for sanding prosthetic restorations. Used for cleaning, roughening, polishing and surface treatments
- · Recommended for users of pressable ceramics

CHARACTERISTICS

- Dune 2: two modules
 Dune 3: three modules
- Tungsten carbide nozzles (0.8 mm Ø as standard) long type
- Pipe throttle valve for instant sand flow blockage
- Electrical "sandblasting machine-aspirator" connection outlet
- Possibility of aiming lighting inside the chamber
- Ergonomic design
- Pedal control
- Exit pipe for connection to the extractor
- Pressure regulator and pressure gauge for each cylinder
- Protective sheet placed on closure window
- Each module supplied with a vibrating system
- Switch for rapid change of sandblasting positioned inside the chamber
- Three nozzles of different diameters:
 Ø 0.6 mm nozzle (for grit from 25 μm to 70 μm)
 Ø 0.8 mm nozzle (for grit from 70 μm to 125 μm)
 Ø 1.3 mm nozzle (for grit from 125 μm to 250 μm)

ADVANTAGES

- The Venturi system from DUNE 2 3, together with a vibrating surface, allows perfect sandblasting at all pressures between 0.5 and 6 bar (traditional sandblasters operate correctly after 2 bar)
- Very low consumption guaranteed by the presence of the Venturi system and the instant sand flow block system
- Thanks to the pressure regulator and pressure gauge for each cylinder, it is not necessary to change the working parameters each time the system is used
- 2-year warranty

C305608	SAB 1000 Extractor for sandblasters

The full list of oxides and microspheres con be found in the product sheet of Zeta Sand.

SAB 1000

Extractors for sandblasting machines and model trimmers

APPLICATIONS

 Extractor to be combined with sandblasting machines to suck up dust during sandblasting operations

CHARACTERISTICS

- Excellent power and dependability
- Guarantees filtering up to 0.3 µm
- Specific dual layer paper filters for extra fine sand

ADVANTAGES

- Optimised sand extractor from the sandblasting chamber
- Dependable, easy to clean and maintain
- Hygienic and easy to empty
- Powerful and constant extraction
- 1-year warranty

Technical data

Zeta Sand

Aluminium oxide and glass beads for sanding

APPLICATIONS

 Abrasion (aluminium oxide) and polishing (glass beads) of surfaces

CHARACTERISTICS

- 1kg triple layer aluminium single refill bags
- High degree of sieving
- Wide range of grain sizes available Packaged in boxes of 5 x 1kg bags

ADVANTAGES

- Raw material quality ensured by a high level of sieving
- Hermetically hot sealed aluminium bag safeguards sand properties for the entire life cycle of the product
- Single refill 1kg packaging preserves sand from moisture, a main cause of sandblasting machine malfunction
- Wide range of grain sizes allows dental technicians to perform any kind of sanding

Packaging	
C308200	Aluminium oxide 5 x 1kg bag 25 μm
C308202	Aluminium oxide 5 x 1kg bag 50 μm
C308204	Aluminium oxide 5 x 1kg bag 75 μm

C308216	Aluminium oxide 5 x 1kg bag 250 μm
C308218	Glass beads 5 x 1kg bag 40/70 μm
C308220	Glass beads 5 x 1kg bag 90/150 μm
C308222	Glass beads 5 x 1kg bag 150/250 μm

Polimer 180

Electronic pressurised polymerizer

APPLICATIONS

- Firing of acrylic resins at variable pressure
- Cylinder pressurisation

CHARACTERISTICS

- Front panel display shows polymerizer temperature, time and pressure
- Up to 10 memorisable programs
- Setting of working time from 1 minute to 99 hours
- 100% stainless steel support structure
- · Safety microswitch which detects opening of lid
- Internal machine safety valve
- Equipped with filter with air pressure regulator
- Self-locking lid closure
- Polimer are able to contain 2 self-standing medium size flasks
- Maximum working pressure 6 bar
- Precise and flexible electronic control allow an optimal treatment of resins

ADVANTAGES

- Robust stainless steel structure which makes the equipment extremely dependable
- Satisfies all technical requirements requested for resin treatment
- Durable and easy maintenance
- 4 discharge cycles (air/water) can be set and can be combined with 2 cooling cycles (slow/fast)
- 1-year warranty

XR0070095	Work holder support with pliers for polimer 180

Prothyl polimer

Boiling Polymerizer for acrylic resins

APPLICATIONS

· Polymerization of acrylic resins

CHARACTERISTICS

- Basin and internal parts in stainless steel
- Capacity of up to 8 self-standing medium size flasks
- · Cover closure with washer
- Electronic microprocessor control complete with graphic display which manages the equipment
- Up to 10 different polymerization programs can be set.
 To help the user, the first 2 programs are pre-set for the polymerization of Zhermack resins
- 5 programmable phases
- Parameters set per each phase: temperature and maintenance time
- Equipped with practical tap for draining water

ADVANTAGES

- Extremely practical and quick due to the programmable polymerization programs
- Excellent static and dynamic precision due to the electronic control with microprocessor
- The machine's high quality ensures a longer working life
- 2-year warranty

Zhermack TECHNICAL

Quasar

Infrared welding machine

APPLICATIONS

 Braze welding of precious metals and base alloys at high temperatures without direct flame

CHARACTERISTICS

- Quasar Production of thermal energy using an optical system of infrared light capable of generating a maximum temperature of 1350 °C
- Accurate focus of thermal energy in an optimum welding area of approximately one cm in diameter
- Power adjustment system which gives total control of the heating temperature
- Precise mechanical centring system for accurate focal aiming of the elements to be welded
- Efficient extraction system for fumes and gases produced during soldering
- Electrical rotation of the support plate by means of a joystick to facilitate the internal welding process
- Three-sided shielding allowing viewing of the welding process
- Quasar plus Quasar model with the addition of pedal control operation for spot welding of the metal structure in argon* environments

ADVANTAGES

- Quick and easy to learn welding method
- Quasar Quasar plus infrared welding avoids any combustion processes and related oxidation during the heating phase
- The Quasar plus welding process is faster with respect to traditional methods (laser welding 25 - 30 min -Quasar plus welding 6 min.)
- 1-year warranty

Technical data

^{*}Argon is not supplied with this machine. Ask a trusted supplier.

The system is not suitable for precious alloys with a low melting point below 1050° and base-metal alloys with a high nickel content of >35%

Multiprogram pre-heating furnaces

APPLICATIONS

• For the pre-heating of any type of investment cylinders

CHARACTERISTICS

- Pipe heating system: the resistors are housed inside the special refractor pipes
- Electronic microswitch: detects the opening of the hatch, interrupting the power supply to the resistors
- Preset aspirator command to allow release of fumes
- Possibility to memorise up to 10 different cycles, each with up to 4 positions
- Electronic temperature control with microprocessor which allows the following parameters to be set for each program:
 - temperature
 - maintenance temperature
 - Speed at which temperature rises (expressed in °C/min)
 - Extractor OFF temperature
- Automatic management of the extractor depending on program
- Delayed start with the possibility of setting the day and time of furnace activity
- Maximum working temperature 1100 °C

ADVANTAGES

- The pipe heating system is more efficient compared to the traditional muffle system
- Low energy consumption
- Greater dependability over time
- Lighted LED display makes using this machine quick and easy
- Possibility of modifying a program while it is running
- 1-year warranty

Technical data

CODE	MODEL	SIZE (CM)	INT. CHAMBER SIZE (CM)	WEIGHT (KG)	CYLINDER CAPACITY	MAX. HEAT. SPEED FROM 0 TO 900 °C	VOLTAGE (V / HZ)	TOTAL POWER

XB0030370	Square refractory tube (DM 30) 2 pcs.
XI0030070	Ribbed refractory plate (DM 30)
XI0030030	Vent

APPLICATIONS

• For the pre-heating of rapid-use investment cylinders used for the fusion of metal alloys

CHARACTERISTICS

- Pipe-heating system: the resistors are housed inside the refractor pipes
- Electronic microswitch: detects the opening of the hatch, interrupting the power supply to the resistors
- Outlet provided to control aspirator's evacuation of fumes
- Temperature control with an electronic microprocessor which allows the setting of the following parameters for each program:
 - temperature
 - maintenance time
 - Speed at which temperature rises (expressed in °C/min)
 - aspirator OFF temperature (optional)
- Delayed start possibility allowing the user to set delayed furnace start at a selected day and time

ADVANTAGES

- This furnace is suitable for quick investments: it brings together the advantages of a pipe heating unit with the essentials of electronics
- The pipe heating system is more efficient with a chamber more efficient compared to the traditional muffle system
- Low energy consumption
- Greater dependability over time
- 1-year warranty

Extractor for models D & DM

Extractor pipe system for D / DM series of furnaces

APPLICATIONS

 Connected to the D/DM series of furnaces, this facilitates the extraction of fumes/gases from the pre-heating chamber

CHARACTERISTICS

- Power-on and power-off can be programmed using software
- Compatible for connection to the 30-40-50 model furnaces

ADVANTAGES

- Assists the discharge of fumes/gases from the chamber, facilitating a healthier working environment
- 1-year warranty

Accessories	
C305319	Extractor for models D & DM (VOLTAGE 230V±10% / 50-60 Hz - TOTAL POWER 30 Watt)

Single program pre-heating furnace with two positions

APPLICATIONS

• For the pre-heating of rapid-use investment cylinders used for the fusion of metal alloys

CHARACTERISTICS

- Traditional heating system with muffle
- Electronic microswitch: detects the opening of the hatch, interrupting the power supply to the resistors
- Firing program: allows the user to program a firing cycle composed of two positions for each of which these following parameters can be set:
 - temperature
 - maintenance time
 - Speed at which temperature rises (expressed in °C/min)
- Delayed start possibility allowing the user to set delayed start at a selected day and time
- Maximum working temperature 1100 °C

ADVANTAGES

- Easy-to-use electronic control
- Highly resistant monocoque structure
- 1-year warranty

VAP 1

• For cleaning or steaming prosthetic restorations by

High performance pressurised steam and hot water cleaner

APPLICATIONS

means of a flow of steam and/or pressurised hot water

CHARACTERISTICS

- Automatic water loading from the water supply or an external tank
- Electronic control by means of a microprocessor allowing the user to set a variable pressure between
- Choice of steam or hot water by means of a pedal
- The quantity of delivered steam and water controlled with a regulator handpiece on the machine
- Steam and hot water supply from a gun or fixed nozzle
- Designed to be wall-mounted
- Stainless steel boiler with 4.9 litres total capacity, of which 4 are water rechargers
- · Pressure regulator and certified safety valve shown with a display light
- Stainless steel structure

ADVANTAGES

- Temperature and efficency guarantee enhances cleaner surfaces on all restorations
- The machine's high quality ensures a longer working life
- 1-year warranty

AD8

Water softener for steam generators

APPLICATIONS

• Water softener recommended for steam cleaners with water loaded through the pipeline system

CHARACTERISTICS

- · Constructed in stainless steel
- Outgoing water flow is always maintained. It is even possible to supply water to connected machines during resin regeneration
- Regeneration by means of NaCl (table salt)

ADVANTAGES

- The water softener guarantees a longer life to the steam cleaner
- 1-year warranty

Wet and dry model trimmers

APPLICATIONS

- SQM 25 N is used for wet model trimming
- SQM 25 SN is used for dry model trimming

CHARACTERISTICS

SQM 25 N

- Water disk cooling system
- Front water flow regulator
- Aluminium bodywork
- Abrasive disc reinforced Bakelite under FEPA standards, AR 30, Ø 250 mm x 8 mm
- Safety button as per CE regulation
- Ready to secure to the work surface

SQM 25 SN

- Diamond grinding wheel which allows dry use (without water)
- Control circuit which automatically activates aspirator when model trimmer is switched on
- Safety button as per CE regulation
- Ready to secure to the work surface
- Particularly recommended for hard plasters, investments and resins
- Very reliable, long-lasting disk

ADVANTAGES

- Low-level noise performance
- Securing the trimmer to the workbench guarantees greater stability
- 1-year guarantee

Zhermack*

Minilab

Super compact dental stone workstation for the Dental Surgery

APPLICATIONS

• Designed for dental surgeries who produce their own dental stone models

CHARACTERISTICS

- Ergonomic and extremely compact
- Enamelled steel structure
- Work surface in postforming laminate for fast, easy cleaning
- Possibility to add the Elite® mix vacuum-sealed mixer
- Compressed air gun and aspirator included
- Optional aspirated workholder air channel

ADVANTAGES

- Versatile and quick use
- Allows for the creation of plaster models even in the smallest surgeries
- 1-year warranty

Milling

APPLICATIONS

• Milling for fixed restorations

CHARACTERISTICS

- Milling unit with pantograph arm and parallelometer
- Specific for freehand work thanks to its jointed system
- Equipped with air pressure adjuster, air system, lighting system
- Equipped with Ares 27 micromotor control (2000-27,000 rev/min., 122W)
- Precise Led light

ADVANTAGES

- Easy-to-handle arm for precise milling
- The excellent precision of the M & T system allows improved manual milling operations
- 1-year warranty

M&T 1 - Item holder plate (non-standard accessory)

Technical Data

CODE	MODEL	SIZE (CM)	WEIGHT (KG)	HANDPIECE POWER	VOLTAGE (V / HZ)	TOTAL POWER
C307700	M&T 1 milling machines with pantograph arm and parallelometer	L26 / D25 / H42	19.5	122 Watt	230V±10% / 50-60 Hz	180 Watt

Standard components		
XI0270020	Air kit	
XR0270050	Led adapter	
XI0110140	Pincer wrench	

Accessories	
XR0270030	Item holder plate
XR0270010	Magnetic item holder plate
XR0270020	Pantograph micrometric lock

CM 1

Digital centrifuge with external heat source

* CM1D with optional base support (XR0000020)

APPLICATIONS

 With the aid of a gas/air torch, melt and centrifuges metal alloys inside investment cylinders

CHARACTERISTICS

- CM 1 D: benchtop model *
- Digital electronic control with microprocessor for/with:
 - programming of rotation time between 10 and 60 seconds with digital display
 - digital adjustment of the arm opening starting torque
 - FREE button, to unblock the motor brake
 - START button, pressing this enables start which is triggered by the closing of the hatch
- Sensor noting the correct positioning of the rotation system for safety in the working environment
- Electromechnical hatch-blocking device, avoids the opening of the hatch while the system is rotating
- Quick adjustment of the investment size
- · Pre-set balance adjustment
- Silent, solid structure and perfectly balanced

ADVANTAGES

- The motor brake, hatch block and correct positioning sensor of the rotation system ensure maximum safety levels
- Easy to use thanks to the quick adjustment of the cylinder height and of the balance
- The double-jointed arm optimises the pouring of melted metal into the coating cylinder
- 1-year warranty

XI0000070	Crucible (1 pc.)
XR0000010	Crucible (5 pcs.)

Euclide

With laser pointing

APPLICATIONS

• For drilling dental models with laser pointing for pin application

CHARACTERISTICS

- Drilling depth can be regulated
- Equipped with laser guiding
- Drill heads, core pins, positioning pins and sheaths on both models
- The Euclide M.P. collet chuck can mount drill heads between Ø of 2.7 and 3.2 mm stem

ADVANTAGES

- Laser aiming guarantees maximum drilling precision
- Plate adjustment system guarantees correct drilling depth
- Pull-out plaster tray easily removed and cleaned
- 1-year warranty

A 12

Vibrator for plaster and investment

APPLICATIONS

• Vibrators for pouring plaster into impressions and for investment

CHARACTERISTICS

- Adjustment handpiece for electronic vibration regulation
- A 12: 23x14 cm worktop surface

ADVANTAGES

- Rubber surface is easily removable for cleaning
- Support stands keep vibrations to the vibrating worktop
- Dependability over time
- 1-year warranty

Technical Dat	ta

Die separating unit

XR0190011 Standard support supplied (Standard)

XR0190021 Special support 1 for Model-tray* and Tricodent*on request (Optional)

XR0190031 Special support 2 for Accutrac* on request (Optional)

APPLICATIONS

• Saw for cutting out dies in dental models

CHARACTERISTICS

- Double motor drive command
- Front and side protection panel
- · Safety micro positioned on the front protection
- Powerful magnetic placement surface
- Incorporated dust extractor and lighting systems
- TALETE model: Standard support supplied
- TALETE SPECIALE 1 model: Special 1-type support and diamond tool Ø 75 mm, thickness 0.3 mm. Suitable for MODELTRAY or TRICODENT systems
- TALETE SPECIALE 2 model: Special 2-type support and diamond tool Ø 75 mm, thickness 0.3 mm. Suitable for ACCUTRAC system mill
- Workholder supports 1 2 are supplied on request

ADVANTAGES

- Double action command (rubber-protected) and micro suspension motor switch positioned on the front protection screen
- Protected buttons prevent dust from damaging internal machine components
- High power, high rotation speed and solid structure for maximum cutting precision
- Incorporated dust extraction system guarantees high-powered aspirator
- 1-year warranty

XR0190021	Workholder supports 1
XR0190031	Workholder supports 2

Zhermack, a major player in the global market, at the service of its local clients

Experience

30 years of experience in designing advanced solutions for the dental industry have enabled the creation of highly reliable systems for dental laboratories and dental surgeries.

Reliability

Performance durability and reliability over time are the strengths of each Zhermack product. From the meticulous choice of components to testing and functional inspections, each phase is followed with special care before marketing products.

Zhermack By Process:

Our quality management system is certified since more than twenty years according to ISO 9001 and 13485 regulations.

Our environmental management system is certified since 2001 according to ISO 14001 regulation.

Zhermack By Product:

Our products fulfill the applicable European Regulations requirements (medical devices and equipments) and the international rules of the main Extra CEE countries as Russia, Brazil, China, Japan, Canada and USA.

JPAL Accreditation Certificate of foreign medical device manufacturer

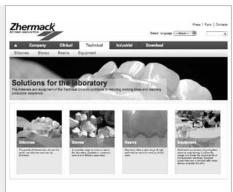

Post-sales service

Availability, transparency and efficiency in customer care are the main principles of Zhermack's after-sales service. Our highly qualified in-house service personnel also deal with reseller and authorised service centre training, thus ensuring dissemination of technical and functional knowledge about each product.

On-line assistance

All technical Zhermack documentation is available at www.zhermack.com. Each product data sheet allows quick reference of key information and downloads of in-depth information material such as brochures, manuals, quick start guides and much more.
